Hi !

Where can your child design a computer video game, make a home page, learn to program, participate in Minecraft Modding, take apart a computer, create a graphics animation, write a phone app, learn to use a 3D printer, and make new friends?

The answer to all these questions is National Computer Camp where great futures begin.

We appreciate your interest and would like to introduce you to America's original computer camp since 1978. We are planning an action packed summer and once again expect to be booked.

We are very excited about our plans; National Computer Camps features locations in several states across the USA. Campers may attend one or more weeks and can select one of two programs: the **COMPUTER+COMPUTER** program offers instruction and creative computing. The **COMPUTER+SPORTS** program includes not only computer instruction, but also sports.

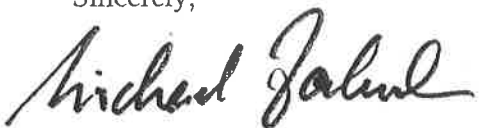

Campers will have the opportunity to meet youngsters from all over the country and abroad and to experience small group instruction with a 5:1 camper to instructor ratio. NCC also offers optional recreational activities; in addition to computers, the campers enjoy superb recreational facilities.

I would like to emphasize that camper safety is of utmost importance; all activities including the dorms are supervised at all times. Also, each camper learns on his/her own computer.

I welcome the opportunity to share with you the exciting world of computer camp. To begin your journey visit NCC at [www.nccamp.com](http://www.nccamp.com) and select *About Us/Quick Info* and be sure to meet the NCC Chat Robot that uses artificial intelligence and machine learning. Please feel free to e-mail or call if you have any questions.

NCC is where campers arrive with a dream and leave with a future.

Sincerely,

Michael P. Zabinski, Ph.D.

P.S. Be sure to request a camp reference list and to contact families on the list. They have all agreed to be included and will therefore be pleased to share their NCC experience with you.
